(1) INTERURBAN STREET RY.

This company was incorporated in New York in 1901, with a capital of $500,000, and was then understood to have taken a 999-year lease of the People's Traction Co., which had the right to build an extensive system of trolley lines in the Borough of the Bronx and was to build some fifty miles outside the city limits in connection with the New York Westchester & Connecticut Traction Co. Under the arrangement for financing the needs of the Metropolitan Street Ry., the stock was in February, 1902, increased to $20,000,000, all of which was taken by the Metropolitan Securities Co. The latter company paid $23,000,000 cash into the treasury of the Interurban Co., "receiving in return stock of the Interurban at par and debentures bearing interest at a rate not exceeding 4%." V. 74, p. 379. The Securities Co. is also to acquire all future issues of stock or securities of the Interurban Co. The $23,000,000 of cash received by the Interurban was paid over to the Metropolitan Street Ry. Co., which latter in payment turned over $11,000,000 Metropolitan St. Ry. Refunding 4s (since disposed of) and certain securities "liberated by the payment of the unfunded debt and other assets now almost entirely unproductive." The list of securities is understood to include $8,000,000 of Third Avenue RR. stock. The Interurban Co. has also leased the Metropolitan Street Ry. for 999 years from Feb. 14, 1902, for 7 per cent per annum on its stock.

METROPOLITAN STREET RAILWAY—

Underground trolley and horse.

Lease and New Financial Arrangements.—In February, 1902, arrangements were carried out (as narrated above in the remarks concerning the Metropolitan *Securities* Co. and the Interurban St. Ry Co.) for meeting the company's financial needs, and on Feb. 14, 1902, a lease was made of the Metropolitan St. Ry. for 7 per cent on its stock to the Interurban St. Ry Company for 999 years. V. 74, p. 379. The Metropolitan street Ry. received approximately $23,000,000 to liquidate the unpaid remainder of the floating debt incurred in the purchase of the stock of the Third Avenue RR. Co. and "to defray the expense of extending the electrical system to upwards of 80 miles of Metropolitan lines still operated with horse cars." In payment the Metropolitan turned over $11,000,000 of its new Refunding 4s and certain securities and other assets in the Metropolitan St. Ry. treasury, including, it is understood, $8,000,000 of Third Avenue RR. stock. Metropolitan St. Ry. stockholders were given the right to subscribe for $23,400,000 stock of the new Metropolitan *Securities* Co.

As part of the general plan, the Metropolitan St. Ry. at the same time created a new mortgage for $65,000,000, $11,000,000, being for immediate issue and going to the Interurban St. Ry., the rest being reserved to retire prior liens.

ORGANIZATION—Organized on Nov. 12, 1895, and by consolidation, lease and otherwise has acquired control of practically all the street railways of Manhattan Island except the Manhattan Elevated.

The Metropolitan Street Ry. has absorbed by consolidation the following companies, embracing the "lines owned."

IN 1893—	IN 1894 AND 1895—
Houst. West St. & Pavonia Ferry.	Metropolitan Crosstown.
Chambers St. & Grand St. Ferry.	Lexington Ave. & Pav. Ferry.
Broadway Railway.	Columbus & 9th Ave. RR.
South Ferry RR.	

Has also acquired the following by lease or stock ownership:

Bleecker St. & Fulton Ferry.	Ninth Avenue RR.
Broadway & 7th Avenue	Second Avenue RR.
Central Cross Town, including Christopher and 10th St. (a)	Sixth Avenue RR.
Central Park North & East River.	Third Avenue RR (a)
Eighth Avenue RR.	Thirty-fourth St. Cross Town. (a)
Forty-second St. & Grand St. Ferry.	Twenty-eighth & Twenty-ninth St. Cross Town (a)
Fulton St. RR. (a)	Twenty-third St. Ry.
New York & Harlem.	

(a) Make separate reports.

The miles of track operated have been increased from 80 in 1893 to 131 in 1894, to 140 in 1895, to 172 in 1896, to 214 in 1902. The acquisition in 1900 of the Third Avenue system added 216 miles more of track, making now a grand total of 430 miles of track.

The Elm Street Connecting Railway Co. was incorporated in May, 1900, in the interest of the Metropolitan Street Ry. to build a line on Elm St. from Centre St. to Great Jones St. and through Lafayette Place, a distance of 6,000 feet, as a short route for the 4th Avenue line.

In March, 1900 (V. 70, p. 584), purchased in the open market a controlling interest in the Third Avenue Railroad and in April, 1900, took a lease of the same. In an interview in the New York "Times" Feb. 18, 1902, President Vreeland is quoted as saying, "We paid an average of 80 for our 80,000 shares of Third Avenue stock." In July, 1900, built a strip of road across Manhattan Street, connecting the Metropolitan system with the Third Ave., and began running cars through from the Battery to Fort George.

Electric Lines.—The Broadway line was changed from cable to underground trolley on Sunday, May 26, 1901. V. 72, p. 1055, 1080. The Lexington Ave. Line was converted May 5, 1901, and the Columbus Ave. line May 11, 1901. In addition the company is using its underground electric system on Eighth Ave. line from 158th St. to Battery Place; over the entire Fourth Avenue line; over the greater portion of the Second Ave. line; over the 23d Street line, and over the Sixth Ave. line via 59th Street and Amsterdam Ave., over the branch of the Third Avenue Railroad to Fort George, over the 7th Avenue line, and over the 9th Avenue line between 53d St. and Cortlandt Street Ferry. V. 66, p. 337, 520, 616; V. 67, p. 530, 736, 956; V. 72, p. 936, 989, 1080.; V. 75, p. 135. It is expected that several other lines will be converted to electricity in 1903. V. 76, p. 331.

In August, 1899, began to operate the Twenty-eighth Street and Twenty-ninth Street lines exclusively with air-power cars, but in May, 1901, road began using horse cars again. In July, 1900, began operating cars by the electric storage battery system on the 34th Street Cross-Town line, but is to be replaced by underground trolley.

In July, 1901, the New York Electrical Vehicle & Transportation Co. inaugurated an express service on the Eighth Ave. line. V. 73, p. 35.

For decision in New York Supreme Court adverse to the validity of the franchise, under which the Lexington Ave. extension of the Houston West Street & Pavonia Ferry RR. and also the line across 116th Street was built, see V. 72, p. 45.

Franchise Tax Illegal—For decision of Appellate Division in the case of the Metropolitan St. Ry., declaring the franchise tax law invalid, because it violates the home-rule provision of the State Constitution, see V. 76, p. 174 and 212. For reduction in assessments in legal proceedings, see V. 76, p. 331. For decision as to car taxes, see V. 75, p. 1399.

Compressed Air Co.—The Metropolitan St. Ry. in Dec., 1902, offered to surrender its holdings of pref. stock ($755,000) of the Compressed Air Co. and take common stock for same in consideration of its not being required to purchase any of the bonds for which that company was asking subscriptions; see V. 76, p. 268.

Besides the $11,000,000 of bonds immediately issued (going to the Interurban St. Ry.), $1,780,000 have been sold for refunding (taking up $1,650,000 of prior bonds), making $12,780,000 outstanding After Jan. 1, 1920, any part of the bonds reserved for refunding not needed for that purpose are to be available for the general purposes of the company.

THIRD AVENUE RAILROAD — Underground trolley.

ORGANIZATION.—Chartered October 8, 1853. A cable road from December 5, 1893, but in 1899 changed to underground trolley. In January, 1900, the electric line between 125th and 162d streets was completed. In Nov., 1895, purchased control of the 42d Street Manhattanville & St. Nicholas Ave. line. See V. 61, p. 872, 926. Control of Dry Dock E. B. & B. was obtained Aug. 23, 1897. (V. 65, p. 194). In January, 1898, a majority of the stock of Union Ry., N. Y., was purchased.—V. 66, p. 135. In Sept., 1898, Union Ry. purchased Yonkers RR. V. 67, p. 635. In April, 1899, the Tarrytown White Plains & Mamaroneck Ry. was acquired.—V. 68, p. 674.

A traffic agreement, which went into effect April 29, 1899, has been entered into between the Manhattan Elevated and the Third Avenue Railroad system [comprising the Third Avenue RR., the Dry Dock East Broadway & Battery, the 42d St., Manhattanville & St. Nicholas Avenue RR. and the Union Railway lines], providing for an extensive scheme of transfers at cross-town junctions, and also at the terminal points of the two systems. The transfers are granted for an additional fare of 3 cents, making the cost of the entire journey 8 cents. For the latter sum a passenger can thus ride from the City Hall and South Ferry to Yonkers, New Rochelle and Mt. Vernon. V. 68, p. 672, 872.

Owing to failure of negotiations for a new loan to take care of a large floating debt, the Third Avenue Railroad was on Feb. 28, 1900 placed in the hands of Hugh J. Grant as receiver. On March 19, 1900, it was announced that the Metropolitan Street Railway had purchased control of the road in the open market (at an average price, it is understood, of 80) and would provide for the rehabilitation of the company Arrangements were at once concluded through a syndicate, represented by Kuhn, Loeb & Co., for the sale of $35,000,000 of the $50,000,000 new mortgage described below, and on May 24 the property was restored to the company, passing into the possession of the Metropolitan Street Railway Company as owners. Kuhn, Loeb & Co. offered a block of the bonds for sale in Dec., 1900. V. 71, p. 1168.

Lease.—On April 13, 1900, the Metropolitan Street Railway Company took a lease of the property for 999 years. For the first four years Third Avenue stock will receive only the net income above expenses and fixed charges; the next two years 5 per cent is to be paid on the stock; the succeeding four years 6; thereafter 7 per cent.

PHILADELPHIA COMPANY.—Gas (natural and manufactured), electric company, trolley. *(See adjoining map.)*

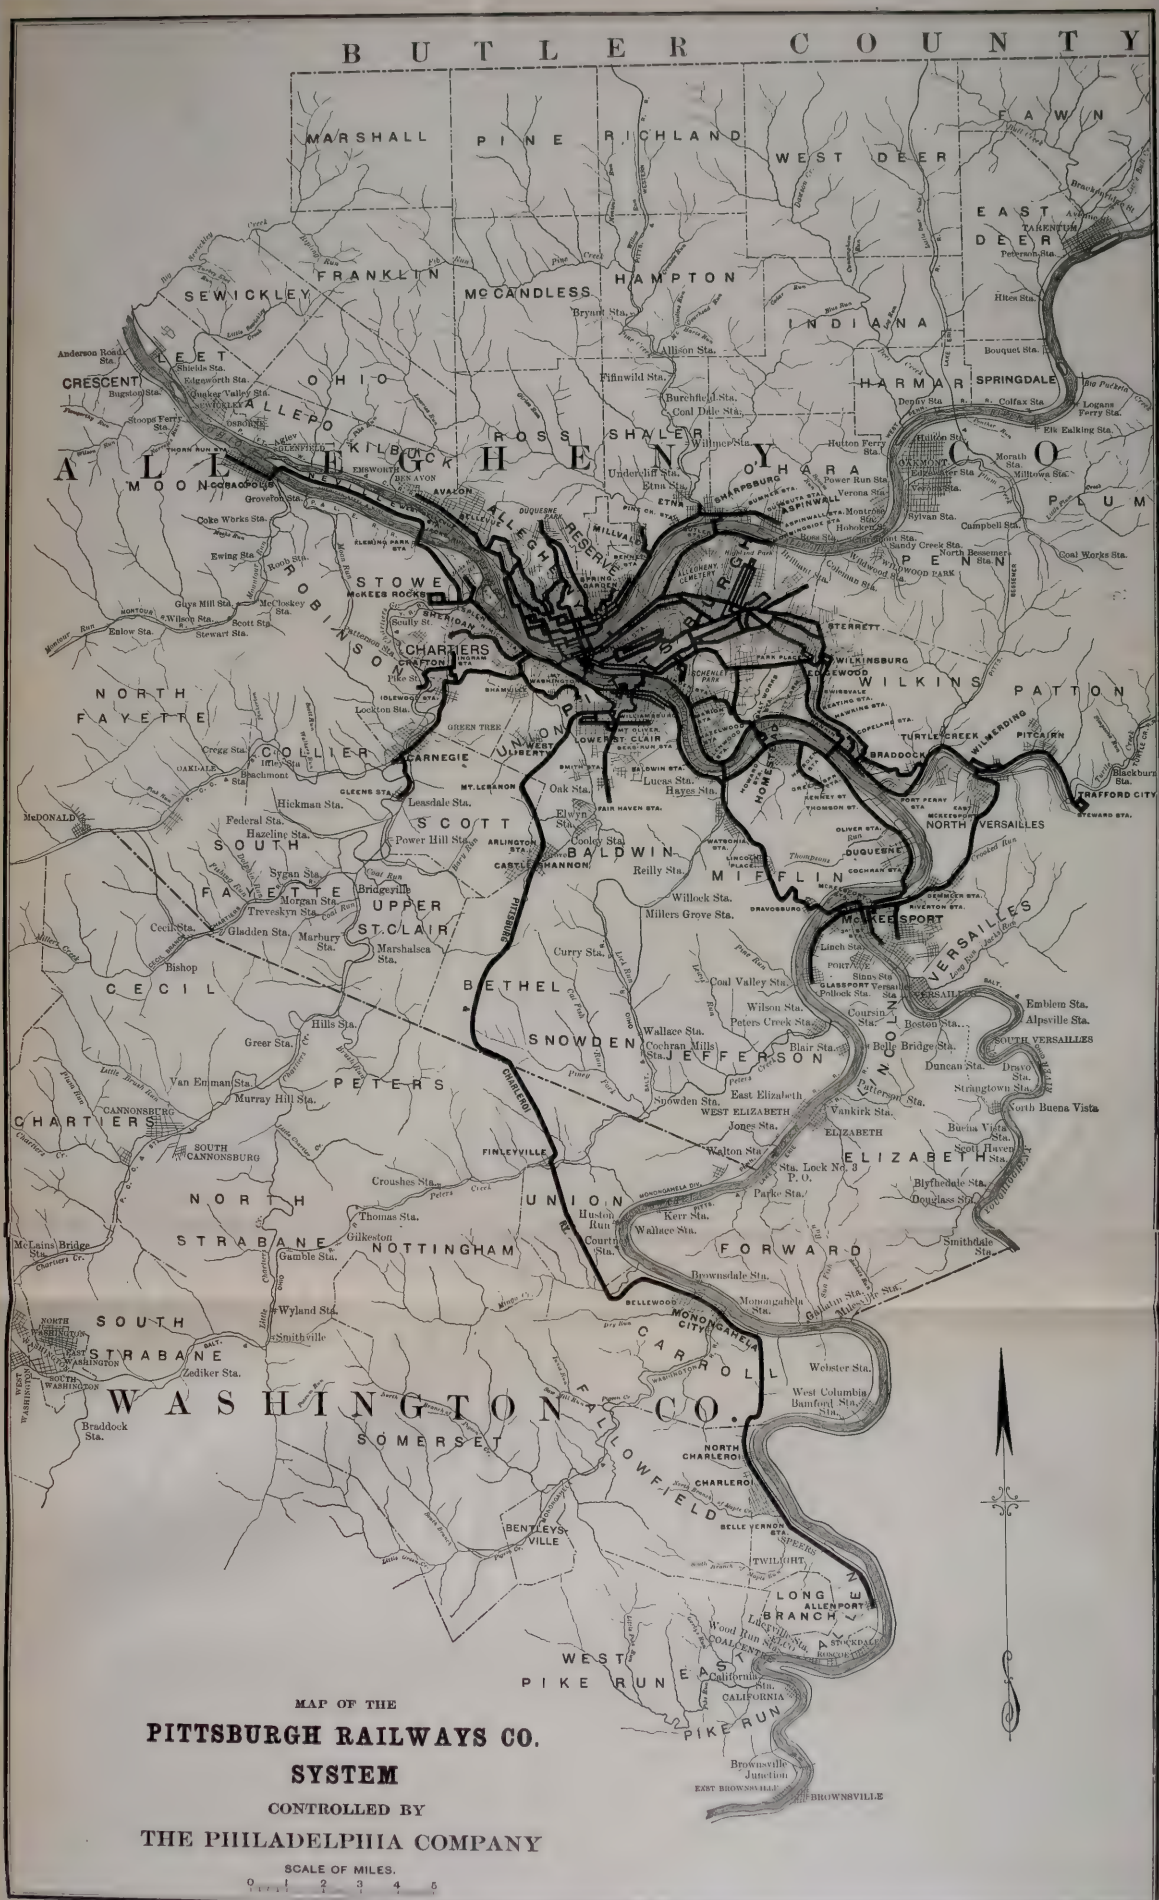
ORGANIZATION.—Organized in 1884 and was originally a natural gas company. Operates under special Act of the Legislature of Pennsylvania (conferring many valuable rights and privileges) granted to its predecessor, the Empire Company, in March, 1871. Its business may be classed under three main heads, (1) Street Railways, (2) Electric Lighting and Illuminating Gas and (3) Fuel Gas.

(1) The STREET RAILWAYS comprise 411 miles of track, all operated (as a matter of convenience and economy) by the Pittsburgh Railways Co., and comprise the following properties:

THE UNITED TRACTION COMPANY,
CONSOLIDATED TRACTION COMPANY,
MONONGAHELA STREET RAILWAY COMPANY,
PITTSBURGH & BIRMINGHAM TRACTION COMPANY,
PITTSBURGH RAILWAYS COMPANY (formerly Southern Trac.),
PITTSBURGH & CHARLEROI STREET RAILWAY COMPANY,
SUBURBAN RAPID TRANSIT STREET RAILWAY COMPANY,
EAST MCKEESPORT STREET RAILWAY COMPANY,
TUSTIN STREET RAILWAY COMPANY.

In Feb., 1902, acquired the elevated railroad franchises which were granted to Messrs. Bigelow, Oliver, Quay and others. V. 74, p. 478.

(2.) ELECTRIC LIGHTING & ILLUMINATING GAS.—Philadelphia Company also owns or controls by lease the following companies, forming the lighting department of its business:



ALLEGHENY COUNTY LIGHT COMPANY,
MONONGAHELA LIGHT & POWER COMPANY,
SOUTHERN HEAT, LIGHT & POWER COMPANY,
CONSOLIDATED GAS COMPANY,
SOUTH SIDE GAS COMPANY,
ALLEGHENY ILLUMINATING COMPANY.
OHIO VALLEY ELECTRIC CO. of Bellevue.

The first three are the only public organizations furnishing electric current for heat, light and power to Pittsburgh and Allegheny and the territory immediately surrounding the same. The Consolidated Gas Company operates under a perpetual charter, and with the Allegheny Illuminating Company and the South Side Gas Company constitutes the only gas-manufacturing companies in the cities of Pittsburgh and Allegheny, and the exclusive right to manufacture illuminating gas in those cities is said to be vested in them.

(3.) FUEL GAS.—Philadelphia Company, through its own lines and those of a number of companies controlled by it, supplies nearly all the fuel gas consumed in the cities of Pittsburgh and Allegheny and the manufacturing towns lying along the Monongahela and Allegheny rivers. Company controls by lease about 300,000 acres of gas lands, and has also acquired in West Virginia and Pennsylvania the gas rights on about 73,917 acres of well-known producing fields. The principal fuel gas companies controlled are:

PHILADELPHIA COMPANY,
CHARTIERS VALLEY GAS COMPANY,
EQUITABLE GAS COMPANY,
PENNSYLVANIA NATURAL GAS COMPANY,
UNION GAS COMPANY OF MCKEESPORT,
ALLEGHENY HEATING COMPANY.

See official statement in CHRONICLE of July 12, 1902, 75, p. 83, for further details regarding the character and nature of the company's business. See also reports of earnings there given.

Operates about 85 miles of track in city of Rochester, with extension to Ontario Beach, 8¾ miles, and to Windsor Beach, 9 miles. Franchise practically perpetual and exclusive. A branch of the Rochester & Suburban (the Summerville Branch) is leased for 10 years from April 15, 1898, at an annual rental of $8,000; see that company under Irondequoit. In addition to the stock of the Rochester Electric Ry also owns 205 shares out of the total 400 shares (par, $50) of the Rochester & Charlotte Turnpike Co.

On July 1, 1902, leased the Rochester & Sodus Bay Railroad for 999 years at a rental of 2½ p. c. on $750,000 preferred stock for first year, 3 p. c. for second year, 3½ p. c. for next year, and 4 p. c. thereafter. No other payments to be made under lease. V. 75, p. 395.

In Jan, 1901, E. W. Clark & Co. became associated with Cuyler, Morgan & Co. of New York in the control of the road, but the latter firm withdrew later, leaving E W Clark & Co., in control.

On May 24, 1901, the stockholders authorized $2,500,000 5 per cent cum. preferred stock and $2,500,000 5 per cent general mort. bonds. SACRAMENTO, CAL.

SACRAMENTO ELECTRIC GAS & RY.—

In Jan., 1903, the California Gas & Electric Co., with capital stock of $15,000,000, was trying to obtain a controlling interest in a number of gas, electric and street railway companies in California, the Sacramento Electric Gas & Railway among the number. See particulars in V. 76, p. 267.

ORGANIZATION—Incorporated April 4, 1896. Franchises expire Oct. 6, 1942. A consolidation of the Sacramento Electric Power & Light and the Folsom Water Power Co

The water power is obtained from Folsom, 24 miles from Sacramento. In 1899 made a contract with the Bay Counties Power Co. for the exclusive use of 2,000 h. p. for immediate delivery and to the extent of 5,000 h.p. if needed. This obviates the necessity of a steam plant, and insures against shortage of power for the future. On July 19, 1899, acquired entire capital ($500,000) of the Capital Gas Co. and in March, 1902, acquired all of the bonds ($150,000). The franchises and assets of this gas company were transferred to the Sacramento Electric Gas & Ry. on Sept. 1, 1902, since which date, the latter has accordingly been conducting a gas business.

A MAGNETIC TRACTION-INCREASER.

In the INVESTORS' SUPPLEMENT for July last some account was given of a device on locomotives called a "traction-increaser." The operation of this temporarily transfers a portion of the total weight from the truck wheels to the driving wheels, the effect being as if portions of the whole mass were shifted so as to bring them directly over the drivers; in case of one particular engine mentioned, about one-eighth of the weight normally on the trucks can be thus transferred, the object being to increase traction—i. e., the pressure of the wheel on the rail.

An ingenious device has now appeared for accomplishing the same object in another way, without employing gravity. On each side of the motor a bearing is placed on the axle of the truck wheel, and this bearing has a curved arm attached which carries a small wheel on its end; the affair resembles the curved leg and roller of a furniture-caster, except that it is nearer horizontal in its curve. Normally, this little wheel (which is without a flange) is carried so as to clear the rail by about $\frac{5}{8}$ of an inch, and is held up by a spring. The supporting curved arm has a coil of wire wound around it, and when a current is turned through it the arm is pulled down and the small, flat-rimmed idler wheel rolls along on the rail. This dipping-down and contact of the little wheel sets up a short magnetic circuit, whose lines flow from the truck axle through the arm and the idler wheel to the rail, then through the rail to the rim of the truck wheel, and through the wheel to its axle, thus making a circuit through the truck wheel and idler and the rail at the two points where they touch it. The singular effect of this is that the truck is pulled magnetically down upon the rail, as if there were a temporary increase of weight of load, and thus traction is increased.

An expenditure of $2\frac{1}{2}$ horse-power in electric energy to magnetize the coils on four of these arms is claimed to produce 350 per cent increase in traction, and the further claim (paradoxical though it sounds) is that when the wheels begin to spin or slide on the rail the tractive effort even increases slightly on account of the generation then of what are called "eddy currents" between wheel and rail. In some reported tests at Seattle (whence this device comes) a car was weighted sufficiently to give a tractive effort 350 per cent greater than with the same car empty, and the current required to drive it on the level was noted; then the current required to drive the same car empty, both with and without the tractive device in action, was noted. It is obvious that when the car was weighted as above to give 350 per cent more traction or grip on the rail, an increase of power was required to move it; but the increased power required when the magnetic device was in action on the unweighted car was only 23 per cent of the increase required to drive it when weighted; so that the traction by magnetism is much less costly in power than traction by gravity. By attaching the car to a dynamometer in order to register the traction, it was found the pull of less than half a ton jumped to from 2 to $2\frac{1}{4}$ tons when the device was put into action.

Putting this device into action adds nothing to weight but simply increases the grip or hug between wheel and rail. In the tests at Seattle, we read, it was necessary to grease both wheels and rail in order to bring the slipping point to a certain relation to motor capacity; the drawbar pull (or tractive effort) was 1,500 lbs. under these conditions, and energizing the magnets carried it to 5,250 lbs. The increased control on grades and in emergency stops, especially when the rails are slippery, and also some improvement in acceleration or "pick-up," are the service claimed on electric roads, and the electric locomotive may be regularly equipped with its magnetic traction, to offset the gravity traction-increaser of its steam-driven brother. The claim is that the device increases the brake efficiency 300 per cent, and is equally applicable to steam roads, on which it could do away with the use of sand, which item alone costs the railroads of the country 10 millions a year.

These are the claims. It is not necessary to accept them fully in order to admit that the device is interesting.

WEEDS OR WHEELS.

About a year ago the question whether the construction of new trolley lines ought to be helped by subsidy grants, as that of steam roads has been, came up in Iowa, and a bill authorizing townships to vote such aid appeared in the Legislature. As has already been said, nobody need feel uneasiness on account of competition between steam and electric roads; the conflict of interests is not irrepressible, being more apparent than real, since each class of road meets the deficiencies of the other, and so the matter will peaceably adjust itself in time. Meanwhile the "Burlington (Iowa) Journal" suggests the following:

"If the State of Iowa wants to do the fair thing by the electric interurban railway she will enact laws that will enable the electric line to use the public highways. There is no good reason why the interurban railway should not take one side of the highway. The country roads are altogether too wide anyhow, and a good electric line enabling the farmer to get to the city with his produce in all kinds of weather would be a much greater boon for the farmer than is found in the present wide, useless country highway occupied principally by weeds."

Electric roads to become in any real sense competitors of steam roads in the proper field of the latter, especially for passenger traffic, must approach the latter in directness of line and solidity of construction; they must occupy their own right of way and must have a roadbed and road which will permit heavy rolling-stock and high speed. There are instances of such construction, of which probably the best known is the Aurora & Elgin Road, referred to several times on previous occasions. It is nearly certain that what may for this purpose be distinguished as "permanent" electric roads will not use the overhead trolley, and it is interesting here to mention that rails have recently been laid in some Hartford streets weighing 102·9 lbs. per yard, which is nearly 3 lbs. heavier than is used on any part of the "Consolidated" steam road. The evolution of electric driving is, no doubt, bringing the electric road and its cars nearer the steam road, thus paralleling it in a sense; the mode of driving is now the most radical difference, and how long that will remain is for the future to decide.

But some people are impatient. For example, an article in a recent number of a popular periodical, entitled "the war on the locomotive," represents that machine as "slowly and sullenly giving way before the insistent trolley," and says (what is probably true and readily intelligible) that the electric cars in Massachusetts carried four times as many passengers in 1902 as the steam roads did; also that "if you have a little time to spare you can go on an electric car to almost any part of Southern New England that you could reach with a locomotive and to many parts that you could not." There are several trolley "guides" extant, and there are tales of journeys between New York and Boston and New York and Chicago; the maps also show long reaches, interspersed with gaps; yet much time, plus much patience, rather than a little, is a condition to such journeys, which nobody would think of undertaking as yet except for the journey's sake. For thus far the interurban electric roads very generally follow the highway, if they do not occupy its edge. They are flimsily constructed and ballasted; they are single-tracked, with frequent turn-outs at which there is often delay; they plunge up and down the natural grades and swing around sharp curves. One engineer actually writes that "it is said that in some cases alignment has been altered to avoid a tree!"

But this does not belittle the importance of electric roads or make against their future development. As to the highway suggestion, there are objections so weighty that they make permanent occupation of a highway strip seem impossible. For that very reason the "weeds or wheels" question is properly a transient one; it is one of pioneering, and the analogy to steam roads is quite close, for steam roads have largely been built anyhow, just to get them open for traffic, and have been finished afterwards out of the development they created. They could not otherwise have been built at all.

The "highway" trolley, displacing with its wheels the weeds along the edge of the road, and furnishing to every house a team which is not stopped by rain or mud, may perform a useful pioneer and feeder service. Even now, the big wagons which bring garden truck to New York markets from the outlying towns on Long Island are still jogging along during each afternoon and evening, and back in the next forenoon, just as they were doing thirty years ago. But the small electric road must be modestly projected and built; it should not be measured by the amount of bonded debt any more than country villages should be measured by that fallacious old rule, the number of churches. The little road is not likely to interest the financier, or even to be much known to investors at a distance. One writer relates that he once "had his clutches" (his own expression) on the franchise of a small line adjoining a minor city with an important freight terminus; there were only three or four miles, with no prospect of extension, but a freight franchise was included, and the paying characteristics were beyond doubt. Laying the matter before a banker friend, he found that dividend prospects were not all the conditions needed, for the banker's business was the placing of securities, and when those were few he did not feel interested.

The point in the case was clear, but not conclusive of anything except that such a road is not for bankers. It is for men who "think in" thousands and hundreds instead of millions; it is a matter properly for local investment. Such a road need pay very little for franchise, being in favor for its prospective service. Its construction can and should be of the up-and-down character above mentioned. Its current may in many cases be derived from water power. Its ideas should be practical and modest, not disturbed by thoughts of extensions and expansions.

ELECTRICAL PRODUCTION AND TRANSMISSION.

A story comes from Punxsutawney, Pa., of a company to be organized for the purpose of utilizing the now wasted heat of the coke ovens for generation of electricity for light and power. The story adds that after the apparatus is installed each coke oven of the common beehive pattern can be made to produce 250 horse power per day at a trifling cost, and as there are approximately 70,000 ovens in the United States, they are capable of producing 17½ million horse power per day—which is obvious as a piece of multiplication. No details of the

newly-patented process are given; yet the story is not to be dismissed as necessarily visionary. The heat of the ovens can be made to turn water into steam—as the title of the company indicates is the intention—if a practicable method can be had; fuel having been burned to produce this heat, to direct it into water before letting it diffuse itself into the air is a matter of detail and not opposed by any natural law.

The idea is interesting as being in line with one of the marked tendencies of the age: the conservation of wastes. A mere list of the materials which once were thrown away but now are utilized in productive industries would be of considerable length, and in that field analytical and experimental chemistry finds large room; but the conservation is now extending to the natural sources of power. There is a large aggregate power in the tides, which has been utilized on a small scale but is comparatively unattractive. Something may yet be done with directly utilizing the sun's heat, the source of all energy, and this was one of the schemes of Ericsson of "Monitor" fame. Meanwhile the harnessing of waterfalls has been taken up in the modern way and is the present great field.

The most famous if not the earliest scheme of electrical production and transmission is at Niagara. But while something has been done there and one of the most interesting thoughts of the visitor at the Buffalo Exposition in 1901 was that the lighting was a transformation of the falling water, the Niagara plant has been largely turned into electro-mechanical and electro-chemical industries, which, although marvelous enough to kindle even a sluggish imagination, are not just what was originally expected.

The Shawinigan Falls, on a tributary of the St. Lawrence, midway between Montreal and Quebec, will supply power to those cities, 90 and 84 miles. An installation on the Susquehanna, just above the Maryland State line, is expected to revolutionize the manufacturing interests of Baltimore. The headwaters of the Hudson at Spier Falls, a place hitherto slightly known as a scenic resort, are also to be brought under subjection. As yet California furnishes the instances of longest transmission, the line extending from the power house at Colgate, in the Sierras, to Oakland, on the side of the bay opposite San Francisco, this stretch being 142 miles, and some later extensions carrying it over 200 miles. In Washington a scheme is under way for utilizing the glacial flow from Mt. Rainier, on whose top, 14,500 feet high, moisture is constantly solidifying, while warmer currents are melting the bottom of the ice cap. The Puyallup River, which leads from the mountain, is to be dammed, and current for light and power will be transmitted to Tacoma and Seattle, 30 and 45 miles. France is undertaking similar work, using the glacial flow from both the Alps and the Pyrenees. In 1863 (says our Consul at Grenoble, which is near the Mt. Cenis tunnel) it was considered a bold achievement to conduct and utilize water from a height of 260 feet; but boldness has gone by successive steps until heights of over 2,000 feet are utilized. Grenoble is now electrically lighted, and the farmhouses get their light incidentally; while in the Romanche Valley, formerly sparsely populated, establishments are already in place for making paper, acetylene, aluminum and other articles.

These are only some of the most striking examples of this widely-spread work. In California the high cost of fuel requires less consideration to be given to the increasing cost of the copper necessary, which was originally thought to be the most serious obstacle to long-distance transmission; yet this obstacle has been considerably modified by improvements in practice, and what the radius of transmission (so to speak) will ultimately be found to be is unknown yet. To read that sanitariums in Eastern Switzerland are to do their cooking and heating by current derived from streams about 12 miles away seems entirely natural, since we are already familiar with power, light and heat coming over the same wire from the same source. In California, also, a double service is obtained, for not only is the power useful in mining operations, but since the water itself is not lessened in the least by intercepting the energy represented by its fall, it becomes available for irrigation, the cost of the latter thus being divided between two purposes. As to the "radius," moreover, there are so many minor streams which have either falls or rapids that even short transmission systems are capable of reaching a large percentage of the country. The process of bringing these under contribution to the world's work is proceeding with enthusiastic energy, much as the country has rushed into development of electric railroads.

A touch of poetry and picturesqueness is given by calling the glaciers "white coal," nor is the term inapt, only they are a natural supply which is in perpetual renewal, and hence inexhaustible for all time. To read of a "white coal" convention of 500 engineers and scientists meeting in Grenoble to discuss the glaciers and mountain streams of France (which one of them estimates as able to furnish the equivalent of nearly double the present steam power in that country) certainly appeals to the imagination. We are to remember that furnishing light and propelling cars are only a part of the possible functions; heating, cooking, driving machinery, and the line of electro-mechanical and electro-chemical industries are potentialities and not distant. For although a "water-power" has been recognized as valuable from the first settlement, we have now means of carrying the power to a distance, instead of being obliged to use it on the spot, and to find a natural power which will turn a wheel means now so many more things.

As to the bearing of this upon the problem of fuel supply, it is rather idle to talk, because we have as yet little beyond estimate and conjecture; but the thought itself is very fertile, and (as a naked proposition) it is not rash to say that, given enough electric energy derived from falling water, the need of fire might almost disappear. Indeed, electricity is like a gate opened to unknown regions, and the most active and aggressive industry in the world to-day (and especially in the United States) is that of electrical materials and appliances.

TROLLEY-WHEEL AND THIRD-RAIL.

The term "trolley," familiarly applied to electric roads, strictly belongs to one device for maintaining connection of the car with the feed wire and does not necessarily go with the overhead system. That system came in first because it was the readiest and easiest installation, and because it followed the example of the telegraph. The trackless car, having some advantages as a pioneer or where tracks are not allowed, involves a second continuous wire, to provide the return path for the current which ordinarily is found in the rail. As an

alternative to this, the feed wire may be underground, with either a trolley-wheel or a "plow" for the contact; or there may be a third-rail. There is no other method than these as yet, and apparently there cannot be any, even for the larger and perhaps coming machine known as the electric locomotive.

The trolley itself has its troubles as a means of contact. It is difficult to maintain in place, and displacement is liable to damage the car and rip off the wire connections; these troubles are so serious that several patent "retractors" are in market which are intended to hold the "broomstick" automatically as soon as it jumps the wire and to facilitate handling it. The standard trolley pattern is a composition wheel running in bearings which are largely of graphite mixture, so that other forms of lubrication are omitted; its smallness of size involves rapid revolution and rapid wear. Its life is supposed to be 500 miles of car run, but we have seen the statement in print lately, on professional authority, that the term of life is from three to seven days. An English pattern has the wheel swiveled (like a straight-stemmed caster inverted) so that it may follow the wire through considerable lateral variation, but there seems to be no means of materially lessening the wear. On the other hand, practice on the Continent of Europe substitutes rubbing for rolling contact by using a "bow" trolley. This is simply a huge inverted U, mounted on the car-top and braced internally so as to keep its shape, and having a shoe which slides on the under side of the feed wire instead of rolling. The advantages of this are that the bow trolley cannot jump the wire; the shoe is simpler and has fewer parts than a wheel; the bow stands so nearly vertical that the start of the car on the return trip at the terminal reverses the angle of the bow automatically, no shifting by hand being required; and the contact surface with the wire is more ample, and sure. As to comparative wear on both shoe and wire, there are no accessible data, although the sliding would theoretically involve more wear.

Contact with an underground conduit by means of a trolley or a sliding plow is one method, but the common one is by a shoe on a third-rail. When this rail is exposed, interruption by snow and sleet is almost inevitable in this latitude, and the experience of the elevated roads here last winter was natural. To the non-professional man there seems no serious difficulty in so mounting the rail as to make contact on its lower instead of its upper side, and safety to life makes inclosing it desirable in all cases and necessary in some. Two devices have been proposed for accomplishing protection in both these respects. One is a closed conduit or box with a cover, laid between the rails. Current is supplied by a cable which ordinarily lies at the bottom of this box and then is not in electric connection with the feed rail; the car, however, carries two magnets underneath, which lift up the cable against a brass strip on the underside of the cover of the box and thus make electric connection with the feed rail at that place. As the car moves, the portion of the cable directly under it is always thus raised, dropping again behind the car to the bottom of the conduit, so that the only "alive" portion of the cable is always that portion under a car. Another device for the same end has shoes sliding on the feed rail, but the rail is made "alive" only in successive sections of about 10 feet, by means of plungers in little cups which are set a few feet apart, these plungers being drawn up so as to make an electrical contact by magnets underneath the car and dropping again as soon as the car passes them. These devices have not yet attained any considerable use.

The simplest mode of protection for the feed rail seems to be to enclose it in a box with two or three sides, and make contact horizontally from the open fourth side; this may be arranged in any convenient manner which allows admission for the shoe, the presumption being that a rail which cannot be touched except purposely is fully safe. The preferable location for the feed rail is outside of the running rails and a few inches above the level of their tops.

Considering the small contact area between the feed wire and the rim of a wheel of a few inches diameter, and the rather imperfect contact of the bearing journals through which all the current must pass, the trolley performs its duty wonderfully well; yet it has its limit and becomes unequal when heavy loads and high speed are required. Wear and burning of both wheel and wire are then more likely, and there is a more or less constant loss of power by the arcs of imperfect contact, which are shown by flashes of light. The first cost of the overhead system is so much less that it will probably continue on highway and pioneer lines, but the third-rail must be the substantial and permanen tsystem.

STREET RAILWAYS.

SECURITIES AND REPORTS.

This is one of our four SUPPLEMENTS. In using the series it is to be remembered that they are inter-dependent publications, complete only as a whole. If utilized together, and with the fresh items of news the CHRONICLE contains from week to week, the investor will have all the information he needs in seeking a safe and remunerative lodgment for his money. Street Railways forcibly illustrate this inter-dependence. Such roads obviously rely for their income, and therefore in great part for the value of their securities, upon the population and activity of the country they serve. Hence constant reference to our STATE AND CITY SUPPLEMENT will be found necessary by those wishing to purchase the stocks and bonds of street roads. Population, assessed valuation, tax rate, total debts of the counties, cities and minor municipalities are given at length in that publication, every one of which items is an essential fact contributing more or less to any correct estimate of the amount of suburban travel a given road commands.

The ABBREVIATIONS used in our Street Railway statements will be found explained in a table immediately following the last statement in this SUPPLEMENT.

A full INDEX which shows where each railway will be found is also given on the closing pages.

ORGANIZATION—Formed in May, 1899. Is not an incorporated company, but a voluntary association managed by a board of fifteen trustees, who hold the title to its assets. Messrs. E. Rollins Morse & Bro. and Tucker, Anthony & Co. of Boston, who promoted the combination, in June, 1899, in offering some of the stock for public subscription [$1,000 of preferred and $500 common was offered for $1,050], stated that "the Declaration of Trust contains strict provisions against the creation of any indebtedness whereby any shareholder or trustee can be held to any personal liability." Comprised originally between 30 and 40 separate properties, but through consolidation there are now only three operating companies, namely the Boston & Northern St. Ry., the Old Colony St. Ry. and the Hyde Park Electric Light Co., together with a few small lines recently acquired and in course of construction. The following is a list of the companies controlled with their share capital May, 1903:

*Composing guaranty fund for performance of Brooklyn City Railroad Company's lease.

The *Brooklyn City RR. Co.* is held under a 999-year lease, dated Feb. 14, 1893, guaranteeing all fixed charges, organization expenses, taxes and 10 per cent dividend on $12,000,000 of stock. The lease is nominally to the Brooklyn Heights RR. Co. but practically to the Brooklyn Rapid Transit Co., since that company owns the entire capital stock of the Brooklyn Heights Company and guarantees payment of dividends to lessor. In 1898 the Heights Company leased the Brooklyn Queens County & Suburban RR. The lease was renewed year by year, rental being fixed charges, taxes and organization expenses. On July 1, 1901, the B. Q. C. & S. began operating separately again. On April 1, 1899, the Heights Company temporarily leased the Brooklyn Union Elevated RR. Co.—see terms under the latter—and also on the same date the Nassau Electric RR. Later, permanent leases were made. See terms under Nassau Electric.

The Brooklyn Rapid Transit Company in April, 1899, also acquired, through one of its constituent companies, all the franchises and properties of the former Brooklyn & Brighton Beach RR. Co., and has converted it into an electric road. The company also then leased for the period of 999 years the Prospect Park & Coney Island RR. (see terms under the latter), the New York & Coney Island RR. and the Prospect Park & South Brooklyn RR. In November, 1899, acquired all the stock of the Kings County Elevated Railroad, which has since been consolidated with the Brooklyn Union Elevated. In Feb., 1902, purchased property of South Brooklyn RR. & Term. Co. V. 74, p. 479.

In April, 1900, the Brooklyn Heights Company began suit against the Brooklyn City RR. to recover about $2,000,000 for failure to fulfill obligations claimed to be imposed by the terms of the lease between the two companies.

¶ Atlantic Ave. general mortgage 5s of 1931 were subject to call in 1909, but many of them (how many is not known) have been stamped releasing them from the liability to call.

Stock—Stock authorized is $45,000,000; issued $45,000,000. The stock was formerly held in a voting trust, but this terminated January 1, 1900, and control is now vested in the owners of the shares.

In the reorganization of Long Island Traction the old $30,000,000 stock paid an assessment of $10 per $100 share, the old stock being reduced to $20,000,000, and $7,000,000 of 5 per cent bonds being authorized, against $3,000,000 of Long Island Traction

Interest on Bonds, Where Payable—Interest on the two Brooklyn Rapid Transit and the two Elevated issues is payable at the Central Trust Co.; on the Nassau Electric bonds, including Atlantic Avenue and West End issues, at the Colonial Trust Co.; on the Brooklyn Heights 1st mortgage at the People's Trust Co., Brooklyn; on the Brooklyn Queens Co. & Sub. mortgages and the Jamaica & Brooklyn 1st mortgage at the First Nat. Bank, Brooklyn; and on the Sea Beach 1st mortgage at the Brooklyn Heights RR. office.

New Mortgage for $150,000,000.—Stockholders authorized March 20, 1902, "General Consolidated and Collateral Trust Mortgage" for $150,000,000. $61,065,000 is intended to retire all the existing bonds of the system, and the rest for improvements, additions and new acquisitions, as needed from time to time. These bonds can be converted into stock, par for par, after July 1, 1904, and before July 1, 1914. In May, 1902, $5,000,000 were sold to Flower & Co. See V. 74, p. 377.

Bonds—Of the $7,000,000 50-year gold 5s of the Brooklyn Rap. Trans., $3,000,000 went to stockholders for the assessment. For description of property covered by the mortgage, see V. 62, p. 1138. See also application in V. 67, p. 904.

Brooklyn City RR. mortgage of 1891 is for $6,000,000 and is a first lien on the old Brooklyn City road and a consol. lien on the lines acquired by consolidation in 1890. Of the $6,000,000 issued, $4,373,000 are in the hands of the public and the balance is held in the guaranty fund.

The total authorized issue of first consolidated mortgage gold 5s of the Brooklyn Queens County & Suburban RR. is $4,500,000, of which $1,616,000 are reserved for extensions, on which they will be a first lien. Of the $2,884,000 outstanding, $2,255,000 in 1898 were endorsed with the guaranty of the Brooklyn Heights RR. Co. as to principal and interest, and in January, 1899, provision was made for guaranteeing the remainder on the payment of ten dollars per bond Both B Q. C. & S. loans are subject to call in 1916.

The Sea Beach Ry. 1st 4s also are guaranteed as to principal and interest by the Brooklyn Rapid Transit Co.—V. 65, p. 1219.

The Nassau Electric bonds are guaranteed (by endorsement on each bond) by the Brooklyn Heights RR. Besides covering the mileage directly owned they are a lien by a supplemental agreement upon the stock of the Coney Island & Gravesend Ry. and the Sea Beach Ry. and will become a direct lien on these lines as soon as they have been formally merged in the Nassau Electric. Of the total of $15,000,000 bonds authorized the unissued remainder is reserved for prior liens. See listing application in V. 72, p. 342.

May be called at 110 and interest on any interest date.

Of the $30,000,000, $12,285,000 are reserved by the terms of the collateral trust indenture to take up an equal amount of the underlying bonds of the allied and controlled companies now outstanding (of which $540,500 used to take up the Niagara Falls & Suspension Bridge bonds and the Niagara Falls Whirlpool & North. bonds, both due July 1, 1903), and $2,000,000 for future betterments and improvements. The syndicate agreement with J. P. Morgan & Co. covering part of these bonds and part of the pref. stock was terminated Sept. 1, 1902.

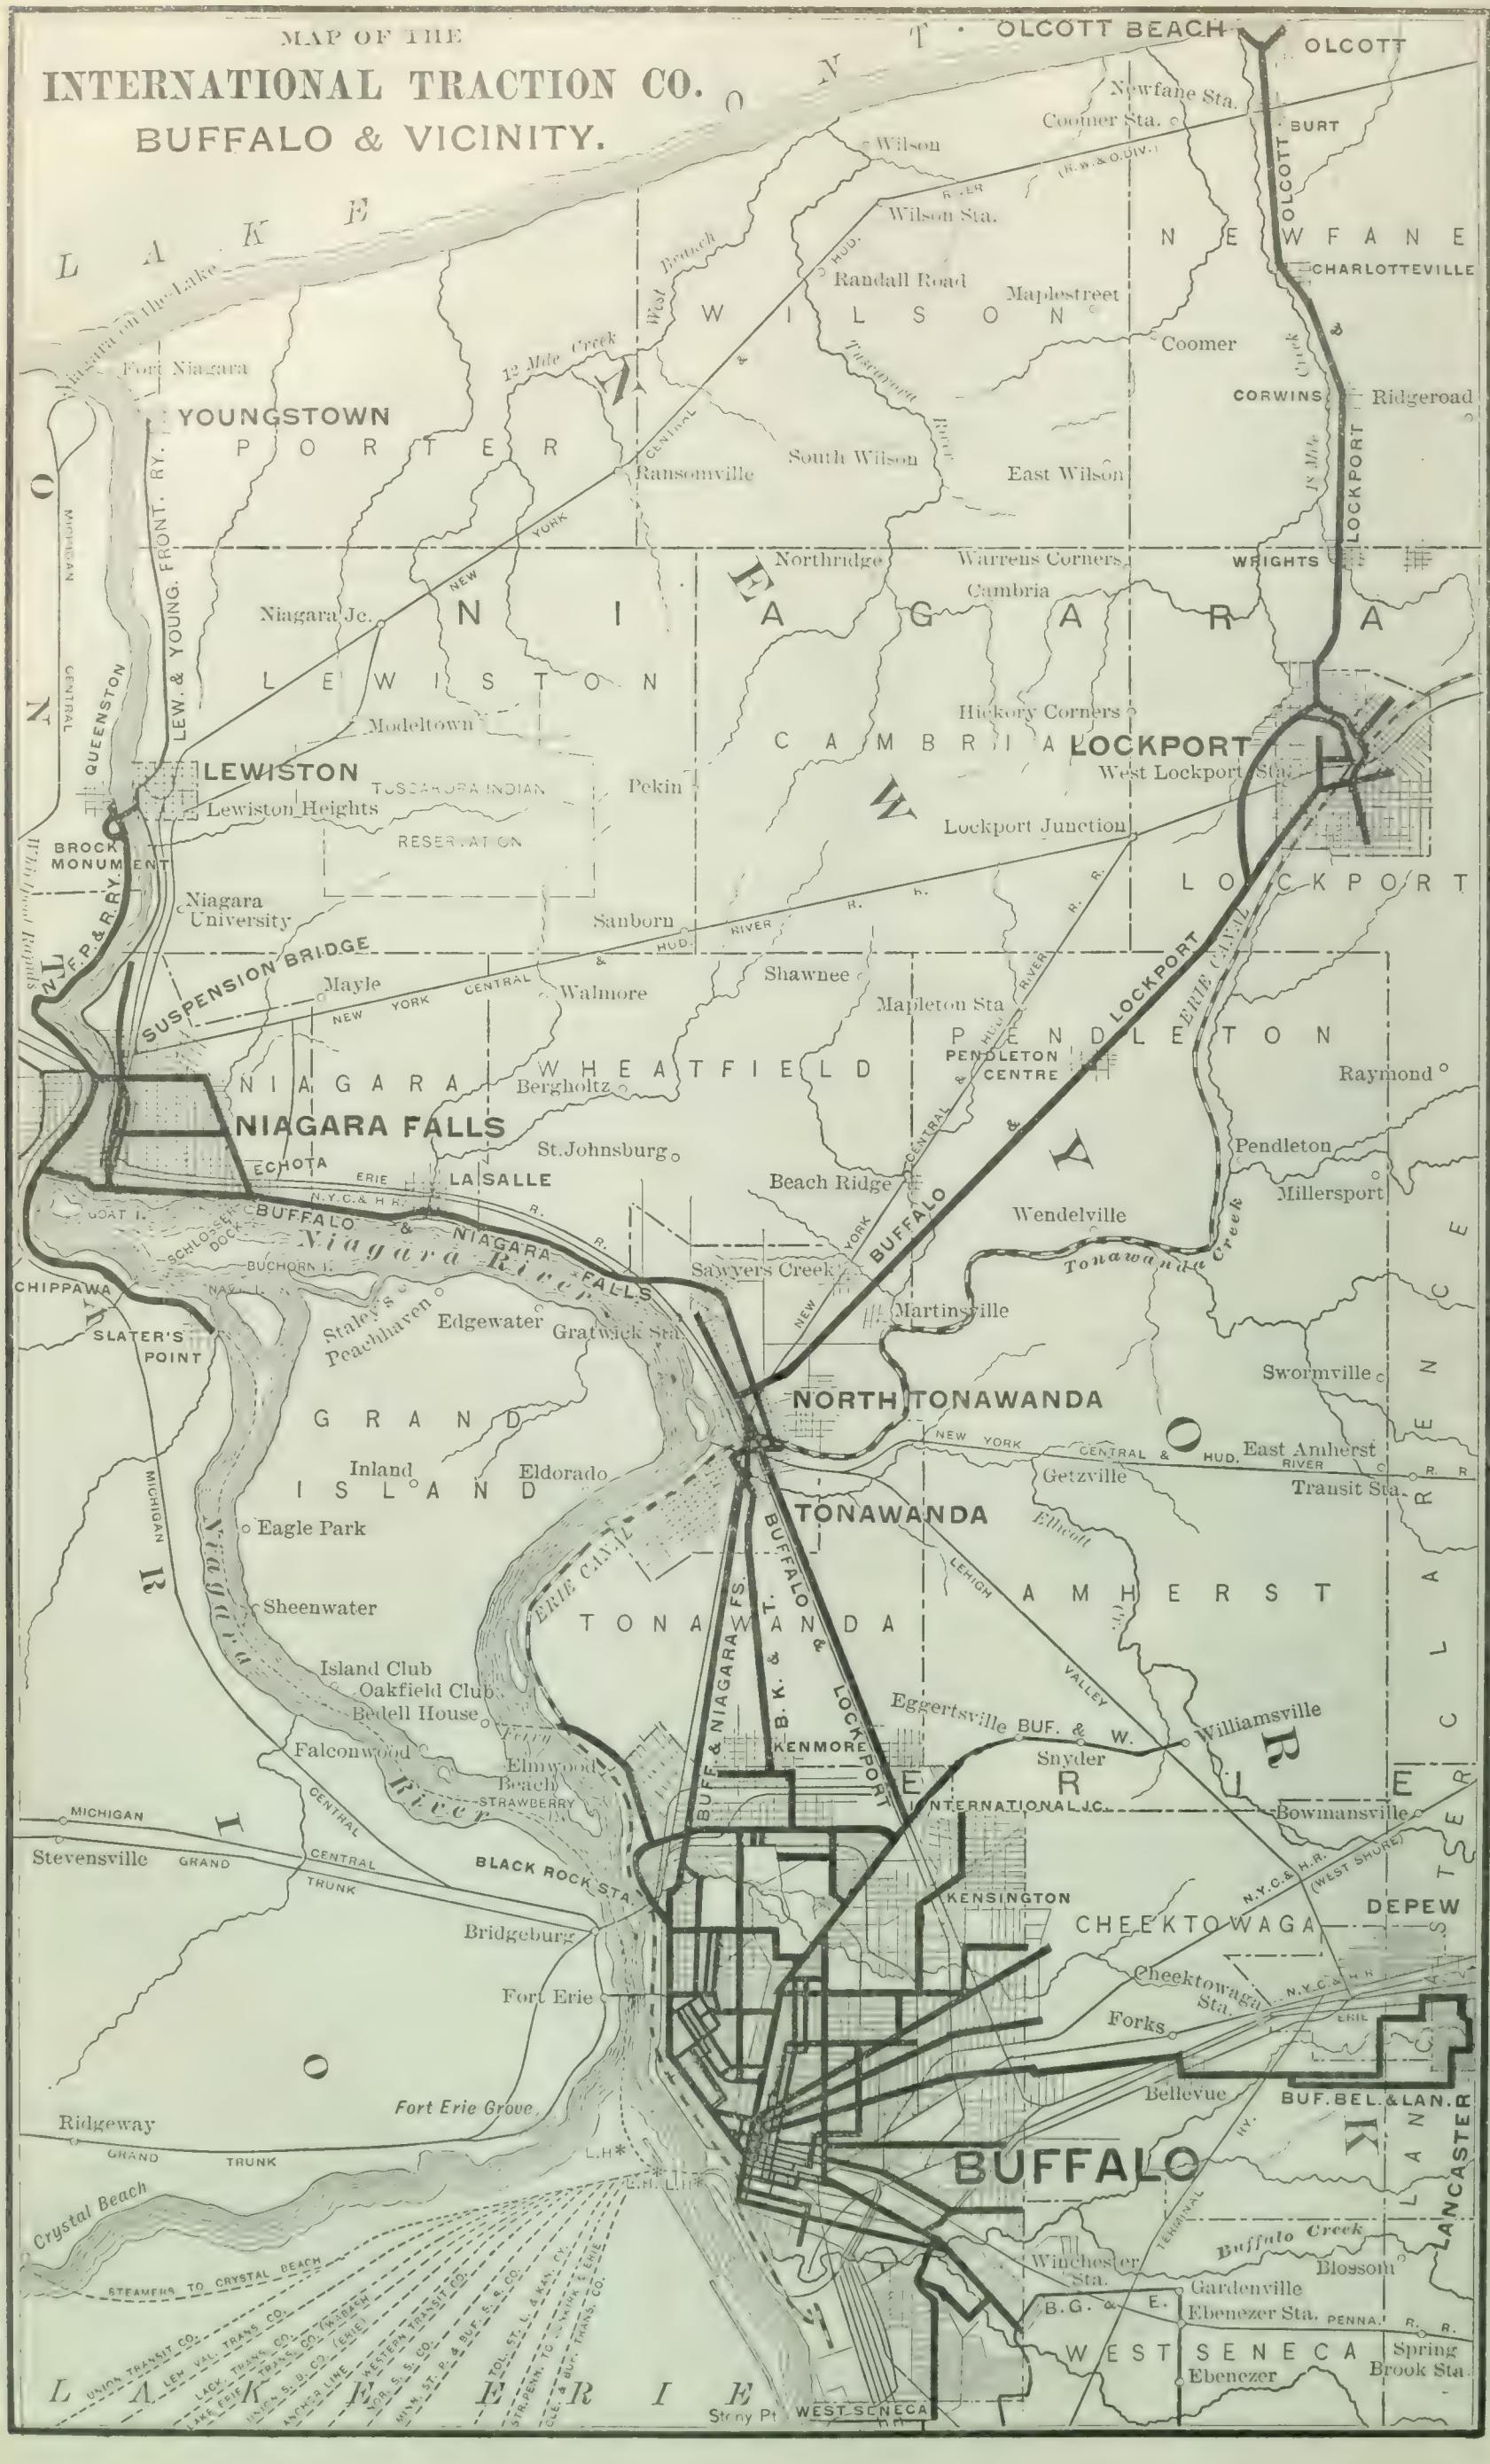
Consolidation of Constituent Companies.—On Feb. 20, 1902, the International Railway Company was incorporated in New York with $10,120,500 stock, but in Aug., 1902, this was increased to $17,000,000, of which $16,320,500 has been issued (all owned by the International Traction Co.) as a consolidation of the following companies, whose shares had previously been held by the Traction Co.; V. 74, p. 427:

Buffalo Railway (after Buffalo Traction and Buffalo Bellevue & Lancaster had first been merged in the same).

Buffalo & Niagara Falls Electric Railway.

Buffalo & Lockport Railway (after Elmwood Ave. & Tonawanda Electric Railway had been merged).

Buffalo Tonawanda & Niagara Falls Electric RR.



Lockport & Olcott Railway.

Niagara Falls & Suspension Bridge Railway (after the Niagara Falls Whirlpool & Northern had been merged in it).

Niagara Falls Suspension Bridge Co.

The Buffalo Railway owned the $2,860,000 stock of the Crosstown Street Ry. of Buffalo, and this passed to the International Railway.

On July 1, 1902, the International Ry. Co. acquired by purchase the Niagara Falls Park & River Ry., the Clifton Suspension Bridge Co., the Lewiston Connect. Bridge Co. and Queenston Heights Bridge Co. This leaves the Crosstown St. Ry. Co. and International Ry. Co. as the only operating companies and eventually (that is as soon as the $1,000,000 Buffalo Ry. debentures secured by $2,000,000 stock of the Crosstown St. Ry. are retired) the Crosstown Street Ry. will also be merged, thus leaving the International *Railway* Co. the sole operating company and the International Traction Co. the holding company. All the outstanding stock of the International Railway and $60,000 bonds of the Tonawanda Street Railway are pledged as security for the International Traction collateral trust loan.

ORGANIZATION—Incorporated October 21, 1893, for 50 years. The West & South Towns St. Ry. (formerly leased) was purchased in May, 1896, and consolidated.

On April 14, 1900, President J. H. Witbeck filed a bill for the appointment of a receiver, and on the 17th Frank H. Sellers of Chicago was appointed receiver; on Feb. 27, 1903, Edwin J. Zimmer succeeded Mr. Sellers. A reorganization committee consisting of James P Black, Lyman M. Paine and Glenn E. Plumb, proposed that bondholders surrender one-half or more of their bonds for cancellation, accepting double the amount in stock. They were asked to deposit their bonds with the Real Estate Trust Co. of New York. No definite progress, however, has been made with the reorganization. A stockholders' committee consisting of Chas L. Bonney (General Counsel of the Company) and Wm A. Goodman and Joseph P. Mahoney, all of Chicago, has been formed, as well as two bondholders' committees, the one for the Chicago General bonds consisting of E. M. Phelps, L. A. Goddard and J. S. Runnells, with the Merchants' L. & T. Co. of Chicago as depository, and the one for the West & South Towns bonds consisting of Granger Farwell, H B. CHICAGO UNION TRACTION.—Cable and electric.

Receivership—In April, 1903, Rafael R. Govin, Jas. H. Eckels and Marshall E. Sampsell were appointed receivers of the Chicago Union Traction and also of the North Chicago Street RR. and the West Chicago Street RR. The receivership was the result of default in the payment of interest on five notes. The notes were for $318,727 against the Traction Co., $565,089 against the North Chicago Company and $270,476 against the West Chicago Company. Interest falling due May 1 on the bonds of both the West Chicago and the North Chicago companies and also the interest due June 1 on the Chicago Consolidated Traction bonds was paid as due.

ORGANIZATION.—Incorporated in Illinois June 3, 1899, by the Elkins-Widener-Whitney syndicate and purchased for $10,000,000 cash the holdings of stock of Chas. T. Yerkes in the West Chicago and North Chicago roads. These holdings consisted of $3,200,000 West Chicago stock and $2,000,000 North Chicago stock. Subsequently the two systems were leased, the West Chicago for a yearly rental equal to 6 per cent on the stock and the North Chicago for a rental equal to 12 per cent on the stock, the leases being dated June 1, 1899. By a tripartite agreement entered into on the same date the Union Traction Company's holdings of stock of the two roads are to remain in trust with the Illinois Trust & Savings Bank of Chicago "for all time" as security for the leases.—See V. 68, p. 1131.

On April 14, 1900, negotiations for the acquisition of the Chicago Consolidated Traction were consummated. The Union Traction paid $45 in bonds of the Chicago Consolidated Traction bearing 4½ p. c. interest and guaranteed by Union Traction and $1 50 in cash for each share of the Consolidated company's stock. All but $46,650 of the $15,000,000 stock of the Consolidated Traction has been turned over under this plan. V. 70, p. 791.

Franchises.—There has been much contention as to the company's franchises, and in June, 1901, company brought suit in the U. S. Circuit Court to restrain the city from interfering with the West Chicago and North Chicago roads. See V. 73, p. 31. Company claims a 99-year franchise under the act of 1865.—V. 72, p. 1137. In May, 1902, Court sustained on technical grounds the demurrer of the city to the bill. V. 74, p. 1037. Permission granted to appeal to U. S. Supreme Court. V. 74, p. 1307. See also V. 75, p. 1201, for decision of Judge Magruder of the Illinois Supreme Court in the transfer cases; also V. 76, p. 1247.

Protective Committee—A committee, with Walter G. Oakman as Chairman, in Jan., 1903, asked shareholders of the Chicago Union Traction, the North Chicago St. RR. and the West Chicago St. RR. to deposit their stock, with a view to coming to an agreement with the city and arranging for a general reorganization providing for a large expenditure of money. Time for deposits extended to August 15.

In the matter of the taxation of franchises, an important decision bearing adversely on all Chicago corporations was rendered by the Illinois Supreme Court in October, 1901. See V. 73, p. 902, 1114: V. 74, p. 775, 1251.

City Ownership—In May, 1903, the so-called Mueller law was enacted in Illinois permitting city ownership of street railways under certain conditions. V. 76, p. 1191. Proposition however must first be submitted to electors and approved by three fifths of those voting thereon. Futhermore the Act is not to be in force at all in any city until the question of its adoption shall first have been submitted to the electors of such city and approved by a majority of those voting.

STOCK AND BONDS.—The $12,000,000 preferred stock was subscribed for at par, a bonus of 50 per cent, however, being given in common stock.—V. 68, p. 1225. There was thus $2,000,000 cash left after the payment of $10,000,000 to Mr. Yerkes, and this $2,000,000 was spent for improvements and extensions of the lines acquired.

In December, 1899, both issues of stock were listed on the New York Stock Exchange. V. 69, p. 1299.

(1) CHICAGO CONSOLIDATED TRACTION.—Electric roads.

On April 14, 1900, the directors of this company authorized agreement for the absorption of the company by the Chicago Union Traction. The latter company paid $45 in Chicago Consolidated Traction bonds, guaranteed by the Chicago Union Traction, and $1 50 in cash for each $100 of stock. V. 70, p. 791. All but $46,650 of the $15,000,000 stock of the Chicago Consolidated stock is understood to have been exchanged in this way for bonds. Sutro Bros. & Co. of N. Y. sought to have the arrangement declared invalid, but Judge Gibbons, at Chicago on Apr. 17, 1901, refused to grant an injunction. Suit finally settled out of court. V. 75, p. 1030; V. 72, p. 775.

ORGANIZATION—The Chicago Consolidated Traction was organized in Feb., 1899, to unite the suburban lines of North Chicago and West Chicago. It acquired the stock of the following roads (V. 68, p. 769).

Under the plan of May 9, 1903, provision is made for the conversion of the $2,800,000 Metropolitan Debentures into stock of the Kansas City Railway and Light Company, or their retirement in due course. The statement, therefore, of the Kansas City Railway & Light Company, on the basis of net earnings of 1903, including fixed charge to be created through the issue of all of said $7,000,000 new bonds, would be as follows:

Net earnings		$1,332,049

		$442,749
Interest Kansas City Elevated Ry. bonds		116,000
Surplus		$326,749

(1) INTERURBAN STREET RY.

This company was incorporated in New York in 1901, with a capital of $500,000, and was then understood to have taken a 999-year lease of the People's Traction Co., which had the right to build an extensive system of trolley lines in the Borough of the Bronx and was to build some fifty miles outside the city limits in connection with the New York Westchester & Connecticut Traction Co. Under the arrange ment for financing the needs of the Metropolitan Street Ry., the stock was in February, 1902, increased to $20,000,000, all of which was taken by the Metropolitan Securities Co. The latter company paid $23,000,000 cash into the treasury of the Interurban Co., "receiving in return stock of the Interurban at par and debentures bearing interest at a rate not exceeding 4%." V. 74, p. 379. The Se curities Co. is also to acquire all future issues of stock or securities of the Interurban Co. The $23,000,000 of cash received by the Interurban was paid over to the Metropolitan Street Ry. Co., which latter in payment turned over $11,000,000 Metropolitan St. Ry. Refunding 4s (since disposed of) and certain securities "liberated by the payment of the unfunded debt and other assets now almost entirely unproductive." The list of securities is understood to include $8,000,000 of Third Avenue RR. stock. The Interurban Co. has also leased the Metropolitan Street Ry. for 999 years from Feb. 14, 1902, for 7 per cent per an num on its stock. In a suit brought by Isidor Wormser Jr., Justice Scott in the New York Supreme Court on June 22, 1903, declared the lease valid and dismissed the charges of fraud.

METROPOLITAN STREET RAILWAY—

Underground trolley and horse.

Lease and New Financial Arrangements.—In February, 1902, arrangements were carried out (as narrated above in the remarks concerning the Metropolitan *Securities* Co. and the Interurban St. Ry. Co.) for meeting the company's financial needs, and on Feb. 14, 1902, a lease was made of the Metropolitan St. Ry. for 7 per cent on its stock to the Interurban St. Ry Company for 999 years. V. 74, p. 379. The Metropolitan Street Ry. received approximately $23,000,000 to liquidate the unpaid remainder of the floating debt incurred in the purchase of the stock of the Third Avenue RR. Co. and "to defray the expense of extending the electrical system to upwards of 80 miles of Metropolitan lines still operated with horse cars." In payment the Metropolitan turned over $11,000,000 of its new Refunding 4s and certain securities and other assets in the Metropolitan St. Ry. treasury, including, it is understood, $8,000,000 of Third Avenue RR. stock. Metropolitan St. Ry. stockholders were given the right to subscribe for $23,400,000 stock of the new Metropolitan *Securities* Co.

As part of the general plan, the Metropolitan St. Ry. at the same time created a new mortgage for $65,000,000, $11,000,000, being for immediate issue and going to the Interurban St. Ry., the rest being reserved to retire prior liens.

On June 22, 1903, in a suit brought by Isidore Wormser Jr, the validity of the lease was sustained.

ORGANIZATION—Organized on Nov. 12, 1895, and by consolidation, lease and otherwise has acquired control of practically all the street railways of Manhattan Island except the Manhattan Elevated.

The Metropolitan Street Ry. has absorbed by consolidation the following companies, embracing the "lines owned."

IN 1893—	IN 1894 AND 1895—
Houst. West St. & Pavonia Ferry.	Metropolitan Crosstown.
Chambers St. & Grand St. Ferry.	Lexington Ave. & Pav. Ferry.
Broadway Railway.	Columbus & 9th Ave. RR.
South Ferry RR.	

Has also acquired the following by lease or stock ownership:

Bleecker St. & Fulton Ferry.	Ninth Avenue RR.
Broadway & 7th Avenue.	Second Avenue RR.
Central Cross Town, including Christopher and 10th St. (a)	Sixth Avenue RR.
Central Park North & East River.	Third Avenue RR (a)
Eighth Avenue RR.	Thirty-fourth St. Cross Town. (a)
Forty-second St. & Grand St. Ferry.	Twenty-eighth & Twenty-ninth St. Cross Town (a)
Fulton St. RR. (a)	Twenty-third St. Ry.
New York & Harlem.	

(a) Make separate reports.

The miles of track operated have been increased from 80 in 1893 to 131 in 1894, to 140 in 1895, to 172 in 1896, to 214 in 1902. The acquisition in 1900 of the Third Avenue system added 216 miles more of track, making now a grand total of 430 miles of track.

The Elm Street Connecting Railway Co. was incorporated in May, 1900, in the interest of the Metropolitan Street Ry. to build a line on Elm St. from Centre St. to Great Jones St. and through Lafayette Place, a distance of 6,000 feet, as a short route for the 4th Avenue line.

In March, 1900 (V. 70, p. 584), purchased in the open market a controlling interest in the Third Avenue Railroad and in April, 1900, took a lease of the same. In an interview in the New York "Times" Feb. 18, 1902, President Vreeland is quoted as saying, "We paid an average of 80 for our 80,000 shares of Third Avenue stock." In July, 1900, built a strip of road across Manhattan Street, connecting the Metropolitan system with the Third Ave., and began running cars through from the Battery to Fort George.

Electric Lines.—The Broadway line was changed from cable to underground trolley on Sunday, May 26, 1901. V. 72, p. 1055, 1080. The Lexington Ave. Line was converted May 5, 1901, and the Columbus Ave. line May 11, 1901. In addition the company is using its underground electric system on Eighth Ave. line from 158th St. to Battery Place; over the entire Fourth Avenue line; over the greater portion of the Second Ave. line; over the 23d Street line, and over the Sixth Ave. line via 59th Street and Amsterdam Ave., over the branch of the Third Avenue Railroad to Fort George, over the 7th Avenue line, and over the 9th Avenue line between 53d St. and Cortlandt Street Ferry. V. 66, p. 337, 520, 616; V. 67, p. 530, 736, 956; V. 72, p. 936, 989, 1080.; V. 75, p. 135. It is expected that several other lines will be converted to electricity in 1903. V. 76, p. 331.

In August, 1899, began to operate the Twenty-eighth Street and Twenty-ninth Street lines exclusively with air-power cars, but in May, 1901, road began using horse cars again. In July, 1900, began operating cars by the electric storage battery system on the 34th Street Cross-Town line, but is to be replaced by undergro und trolley.

In July, 1901, the New York Electrical Vehicle & Transportation Co. inaugurated an express service on the Eighth Ave. line. V. 73, p. 35.

For decision in New York Supreme Court adverse to the validity of the franchise, under which the Lexington Ave. extension of the Houston West Street & Pavonia Ferry RR. and also the line across 116th Street was built, see V. 72, p. 45.

Franchise Tax Legal—For decision of Court of Appeals in the case of the Metropolitan St. Ry., affirming the validity of the franchise tax law, see V. 76, p. 972. For reduction in assessments in legal proceedings, see V. 76, p. 331. For decision as to car taxes, see V. 75, p. 1399.

Charges concerning unearned dividends—Accountants' findings showing no warrant for W. N. Amory's charges that unearned dividends had been paid will be found in V. 76, p. 978 and 1030.

Compressed Air Co.—The Metropolitan St. Ry. in Dec., 1902, offered to surrender its holdings of pref. stock ($755,000) of the Compressed Air Co. and take common stock for same in consideration of its not being required to purchase any of the bonds for which that company was asking subscriptions; see V. 76, p. 268

THIRD AVENUE RAILROAD — Underground trolley.

ORGANIZATION.—Chartered October 8, 1853. A cable road from December 5, 1893, but in 1899 changed to underground trolley. In January, 1900, the electric line between 125th and 162d streets was completed. In Nov., 1895, purchased control of the 42d Street Manhattanville & St. Nicholas Ave. line. See V. 61, p. 872, 926. Control of Dry Dock E. B. & B. was obtained Aug. 23, 1897. (V. 65, p. 194). In January, 1898, a majority of the stock of Union Ry., N. Y., was purchased.—V. 66, p. 135. In Sept., 1898, Union Ry. purchased Yonkers RR. V. 67, p. 635. In April, 1899, the Tarrytown White Plains & Mamaroneck Ry. was acquired.—V. 68, p. 674.

A traffic agreement, which went into effect April 29, 1899, has been entered into between the Manhattan Elevated and the Third Avenue Railroad system [comprising the Third Avenue RR., the Dry Dock East Broadway & Battery, the 42d St., Manhattanville & St. Nicholas Avenue RR. and the Union Railway lines], providing for an extensive scheme of transfers at cross-town junctions, and also at the terminal points of the two systems. The transfers are granted for an additional fare of 3 cents, making the cost of the entire journey 8 cents. For the latter sum a passenger can thus ride from the City Hall and South Ferry to Yonkers, New Rochelle and Mt. Vernon. V. 68, p. 672, 872.

Owing to failure of negotiations for a new loan to take care of a large floating debt, the Third Avenue Railroad was on Feb. 28, 1900 placed in the hands of Hugh J. Grant as receiver. On March 19, 1900, it was announced that the Metropolitan Street Railway had purchased control of the road in the open market (at an average price, it is understood, of 80) and would provide for the rehabilitation of the company. Arrangements were at once concluded through a syndicate, represented by Kuhn, Loeb & Co., for the sale of $35,000,000 of the $50,000,000 new mortgage described below, and on May 24 the property was restored to the company, passing into the possession of the Metropolitan Street Railway Company as owners. Kuhn, Loeb & Co. offered a block of the bonds for sale in Dec., 1900. V. 71, p. 1168.

Lease.—On April 13, 1900, the Metropolitan Street Railway Company took a lease of the property for 999 years. For the first four years Third Avenue stock will receive only the net income above expenses and fixed charges; the next two years 5 per cent is to be paid on the stock; the succeeding four years 6; thereafter 7 per cent.

PHILADELPHIA COMPANY.—Gas (natural and manufactured), electric company, trolley. *(See adjoining map.)*

ORGANIZATION.—Organized on May 24, 1884, and was originally a natural gas company. Operates under special Act of the Legislature of Pennsylvania (conferring many valuable rights and privileges) granted to its predecessor, the Empire Company, in March, 1871. Its business may be classed under three main heads, (1) Street Railways, (2) Electric Lighting and Illuminating Gas and (3) Fuel Gas.

(1) The STREET RAILWAYS comprise 411 miles of track, all operated (as a matter of convenience and economy) by the Pittsburgh Railways Co., and comprise the following properties:

THE UNITED TRACTION COMPANY OF PITTSBURGH,
CONSOLIDATED TRACTION COMPANY,
MONONGAHELA STREET RAILWAY COMPANY,
PITTSBURGH & BIRMINGHAM TRACTION COMPANY,
PITTSBURGH RAILWAYS COMPANY (formerly Southern Trac.),
PITTSBURGH & CHARLEROI STREET RAILWAY COMPANY,
WEST END TRACTION,
SUBURBAN RAPID TRANSIT STREET RAILWAY COMPANY,
EAST MCKEESPORT STREET RAILWAY COMPANY,
TUSTIN STREET RAILWAY COMPANY.

In Feb., 1902, acquired the elevated railroad franchises which were granted to Messrs. Bigelow, Oliver, Quay and others. V. 74, p. 478.

(2.) ELECTRIC LIGHTING & ILLUMINATING GAS.—Philadelphia Company also owns or controls by lease the following companies, forming the lighting department of its business:

ALLEGHENY COUNTY LIGHT COMPANY,

SOUTHERN HEAT, LIGHT & POWER COMPANY,
CONSOLIDATED GAS COMPANY,
SOUTH SIDE GAS COMPANY,
ALLEGHENY ILLUMINATING COMPANY.
BRADDOCK GAS & LIGHT COMPANY,
OHIO VALLEY ELECTRIC CO. of Bellevue.

The first three are the only public organizations furnishing electric current for heat, light and power to Pittsburgh and Allegheny and the territory immediately surrounding the same. The Consolidated Gas Company operates under a perpetual charter, and with the Allegheny Illuminating Company and the South Side Gas Company constitutes the only gas-manufacturing companies in the cities of Pittsburgh and Allegheny, and the exclusive right to manufacture illuminating gas in those cities is said to be vested in them.

(3.) FUEL GAS.—Philadelphia Company, through its own lines and those of a number of companies controlled by it, supplies nearly all the fuel gas consumed in the cities of Pittsburgh and Allegheny and the manufacturing towns lying along the Monongahela and Allegheny rivers. Company controls by lease 289,500 acres of gas and oil lands in West Virginia and Pennsylvania. The principal fuel gas companies controlled are:

PHILADELPHIA COMPANY,
CHARTIERS VALLEY GAS COMPANY,
EQUITABLE GAS COMPANY,
PENNSYLVANIA NATURAL GAS COMPANY,
UNION GAS COMPANY OF MCKEESPORT,
ALLEGHENY HEATING COMPANY.

REVIEW OF DECEMBER.

The close of the month on the Stock Exchange and in financial circles was in marked contrast with the situation the early part of December. Up to the end of the second week of the month the course of prices was sharply downward. Renewed liquidation, even severer than that experienced the previous month, had broken out, and prevailing views were decidedly gloomy. Large numbers of the most active speculative stocks touched the lowest figure of the year on the 12th and 15th of the month. The list included among others such stocks as Baltimore & Ohio, Erie, Chicago & Alton, Denver & Rio Grande, Southern Pacific, Missouri Kansas & Texas, St. Louis Southwestern, Southern Railway, Chesapeake & Ohio, United States Steel Corporation, etc. With these and many other shares at the low point of the year, no one could have seriously supposed that within two weeks the whole aspect of the market would be changed, that a pronounced upward movement would be under way, and that on the last day of the month and year the feeling would be akin to buoyancy. But this is precisely what occurred.

The early depression was largely due to apprehensions as to the future of money. There was also a feeling that the pools in certain stocks were still carrying pretty heavy lines, and that unless they could be forced to lighten their loads their situation might become a menace to the market. The Venezuelan developments, as it happened, came in to further disturb values. Great Britain and Germany had determined upon united action to enforce certain claims against Venezuela and had given the Castro Government very short notice to comply with the demands made. The Venezuelan Government having failed to come to terms, the war-ships of the two European Powers which had been sent to the scene seized and destroyed such of Venezuela's poor outfit of war vessels as were within sight, and then undertook to enforce a blockade of the ports of the Republic. The two Powers were later joined by Italy, and most of the other European Governments also announced claims of one kind or another. For a time the situation looked serious, and in view of the position of the United States with reference to the Monroe Doctrine considerable anxiety prevailed lest this country become involved in the imbroglio.

But all misgivings on this point were finally dispelled. Both the British and the German Governments agreed to submit the matter to arbitration. It

was their desire that President Roosevelt should act the part of arbitrator, but the President being reluctant to fill this office they agreed to accept instead the International Court of Arbitration at The Hague. The close of the month found some minor details still to be arranged, but all doubt as to a satisfactory outcome removed.

Another development that served to change the aspect of things was the formation of a fifty-million-dollar money pool. On Monday the 15th the opening rate for call money on the Stock Exchange was 10 per cent, and severe stringency then seemed imminent. Shortly after noon on that day, however, the announcement came that J. P. Morgan, James Stillman, President of the National City Bank, and George F. Baker, President of the First National Bank, had formed a pool to loan $50,000,000 should emergency arise to make such action necessary. J. P. Morgan & Co. subscribed $5,000,000, and so did the National City Bank, the National Bank of Commerce, the Hanover National, the Western National, the Chase National, the First National and the National Park Bank; the Corn Exchange subscribed $2,500,000, the Chemical and the Bank of New York each a million, and various other banks smaller amounts. The pool was not called upon to loan any money, as rates did not rise high enough to make action on its part necessary; but the existence of the pool was a guaranty that no severe stringency could occur, thus allaying fear on that account.

There were some other circumstances that tendered to rehabilitate confidence in Stock Exchange circles. Rates of foreign exchange weakened considerably, and for the time being the likelihood of gold shipments to Europe disappeared. Furthermore, the opinion gained ground that liquidation on the Stock Exchange had not only been thorough but had been practically completed. It was argued likewise that the Street had passed through a trying time in a very creditable way, showing an underlying basis of great strength. Some minor incidents also contributed to promote the upward reaction. Among these were rumors—which, however, were not substantiated—that a settlement in the copper warfare between the Amalgamated Copper people and the Heinze interests was under way; these rumors caused a rise of several points in Amalgamated stock.

On the 31st the sales of stocks reached 1,008,141 shares, making that one of the heaviest day's business for the month, and the tone was almost uninterruptedly strong. For the month the sales were 15,718,667 shares.

The course of money rates the last half of the month was controlled very largely by the action of financial interests in forming the $50,000,000 money pool referred to above. There was no superabundance of loanable funds—in fact, the banks were not inclined to encourage a very venturesome spirit; the existence of the pool, however, was assurance that there would be enough money to meet all essential requirements. Call money on the Stock Exchange on the 29th, the 30th and the 31st got as high as 15 per cent, but that was simply in preparation for the large 1st of January disbursements, and the pool found no warrant for action on its part.

Foreign exchange rates, as already stated, tended downwards and prices December 31st were close to the lowest figures of the month. Up to about the 10th the market was strong, but after that a sharp break occurred. Quite liberal offerings of sixty and ninety day bills, representing sterling loans, were reported. On more than one occasion, too, there were offerings of bankers' bills against purchases of securities on London account. The latter part of the month an unusual difference between the rates for cables and for sight bills developed. This was explained as due to the fact that bankers having remittances to make before the end of the year preferred to employ their money here as long as possible instead of buying demand bills. No shipments of gold to Europe occurred, but there were several shipments the first two weeks to the Argentine Republic, aggregating $2,018,000 for the month.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1902. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Prices about January 2, 1902*," were made on that date except those in italics, which are the nearest in January, 1902. The black-faced letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*
